OZONE in Belgium**Number of days with exceedance of the EU information threshold (*)****VALIDATED DATA**

(*) number of days on which the hourly average ozone concentration of 180 µg/m³ has been exceeded in at least one measuring station in Belgium

This indicator provides no information on the scope or the duration of the excess. The reported number of days depends in fact on the number of monitoring stations, and thus excludes any comparison between periods or regions with a different density of monitoring stations.
